MONTH IN REVIEW
NOVEMBER 1990

Civilian Labor Force

The state unemployment rate decreased by 0.1 of a percentage point from October to 5.3 percent in November 1990 as both unemployment and employment declined. The decline in the unemployment rate reflected diminished labor force participation rather than a pickup in employment. One year ago, the unemployment rate was 5.1 percent or 0.2 of a percentage point below the current rate.

The comparable national jobless rate (not seasonally adjusted) increased significantly by 0.4 of a percentage point--to 5.8 percent in November. The slowdown in the economy, first felt in the Northeast, has become evident across most of the nation. The nation's unemployment rate was 0.6 of a percentage point higher than it was one year ago.

Total unemployment inched down 10,000 over the month to 452,000. Since November 1989 unemployment has increased by 10,000. For the current economic cycle, unemployment was at its lowest levels during 1988. Since November of that year unemployment has increased by 80,000.

Nonfarm Employment

Job market conditions worsened in New York in November as the number of nonfarm jobs (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) declined uncharacteristically by 10,100 from October 1990 to 8,279,900 in November. A decline in the job count in November is rare. The state last experienced such a decline in 1982.

The softness in the job market was evident by especially large job losses in manufacturing (-16,400) and construction (-8,300). Factory job losses were widespread among both durable and nondurable goods producers, down 9,400 and 7,100 respectively. Nevertheless, a prominent manufacturing industry in the state--photographic equipment and supplies--bucked the wider trend and grew slightly in November. Construction employment declined more than usual, down 8,300 over the month.

Smaller losses,atypical for this time of year, were reported by employers in the services, finance, insurance and real estate, and transportation and public utilities divisions. Services lost 3,400 jobs over the month because of job cutbacks in business services, lodging, and personal services. Below-normal hiring in social services, and engineering and management also contributed to the poor performance in services. Employment losses in the banking and brokerage industries were responsible for the 2,200 shortfall in finance, insurance and real estate jobs. The transportation and public utilities division edged downward by 400 with most of the loss in the communications segment.

The usual seasonal pickup in retail trade was hard to find this year. Employment in trade (+8,600) experienced only one-third of the usual Christmas period increase this year. Government jobs increased 11,700 over the month, in line with past November performances. Government job additions reflected hiring among school districts.

Compared with a year ago, nonfarm employment in the state was lower by 71,600. After adding strikers involved in last year's massive strike in the communication industry back into the year-ago job level, the November-to-November decline totaled 109,600 or 1.3 percent. (This adjustment is needed to fully account for the job erosion that has taken place.) The November 1989-November 1990 job loss was the worst over-the-year employment decrease for November since 1975.

Since November 1989, employment has declined in manufacturing (-61,100), trade (-54,400), construction (-43,900), and finance, insurance and real estate (-20,300). The job count remained above the year ago level in services (+50,100), government (+16,100), and transportation and public utilities (a strike-adjusted 4,300).

UNEMPLOYMENT INSURANCE TAX RATES, 1989

Elias D. Loizides

HIGHLIGHTS

- Assignments of 1989 normal tax rates to firms qualified for experience rating were made from the lowest tax rates column (seventh from the left) in Table 1. The Size-of-Fund Index rose from 5.8 percent on December 31, 1987 to 6.9 percent on December 31, 1988. The December 31, 1988 index was used to determine the tax column in effect for 1989, and resulted in the lowest column of rates to remain in effect.

- The General Account balance rose from a deficit of $32 million in 1987 to a surplus of $418 million on December 31, 1988. As a result, no subsidiary tax was levied on employers in New York State for the 1989 calendar year.

- Unemployment Insurance (UI) tax rates for 1989 averaged 1.88 percent of taxable payrolls.

- Among the major industry divisions,[1] average 1989 tax rates were highest in mining, and were lowest in finance, insurance, and real estate.

- Firms with taxable payrolls under $10,000 or over $10 million had the lowest average UI tax rates in 1989, while rates averaged highest among employers with taxable payrolls in the $100,000 to $999,999 range.

PROVISIONS FOR RATE ASSIGNMENT

Under the current New York State system, covered employers pay unemployment insurance taxes on the first $7,000 of wages that they pay to each of their employees during the calendar year.[2] These taxes are pooled in an Unemployment Insurance (UI) Fund, from which benefits are paid to all eligible unemployed workers.

An employer's tax rate is composed of two parts:

(1) a normal rate, which may be based on both the employer's experience with unemployment and the level of reserves in the UI Trust Fund, and

(2) a subsidiary rate, which is the same for all employers, and is determined by the year-end balance in the General Account.

Normal Experience-Based Rates

To vary employers' normal tax rates according to the incidence of unemployment among their workers (often referred to as "experience rating"), a bookkeeping account is set up within the Unemployment Insurance Fund for each covered employer. An employer's normal taxes are credited, and chargeable benefits paid to an employer's

[1] Major industry groups as defined in the 1987 edition of the Standard Industrial Classification (SIC) Manual.

[2] Covered local governments and nonprofit organizations may elect to reimburse the Unemployment Insurance Fund for benefits paid former employees, instead of paying taxes; the State of New York also reimburses the Fund for benefits.

unemployed workers are debited to the employer's individual account. On December 31, the computation date for experience rating, an account balance is computed as a percentage of the employer's annual average taxable wages of the last three payroll years,[3] and this "account percentage" is the measure of experience on which one's normal tax rate for the next year is based. An account percentage may be positive or negative depending upon whether the account showed a positive or negative balance at the end of the year.

Once an account percentage has been computed, the employer's normal tax rate is read from the tax table for experience rating shown in Table 1. The seven columns in the tax table show seven alternative rate schedules, only one of which is applicable in a given year. The appropriate schedule depends on the level of reserves in the Unemployment Insurance Fund--the higher the reserves, the lower the scale of rates. The measure of reserve level used for selecting the proper rate column is the Size-of-Fund Index,which is computed by expressing total year-end reserves as a percentage of the combined taxable wages of all liable firms. On December 31, 1988, the Index stood at 6.9 percent;[4] therefore the seventh column (from the left)of normal rates in the table applied for 1989. Rates in this column range from 0.0 percent to 5.4 percent.

Following the assignment of normal tax rates for the coming year (but as of the same computation date), if the balance in an employer's account is negative and the amount of the negative account balance is greater than 2 percent of the employer's annual taxable wages, then the amount in excess of 2 percent of the employer's taxable wages is transferred as a charge to the General Account in the Unemployment Insurance Fund, (see the section on "Subsidiary Tax Rate"). Thus, no firm starts the next year with a deficit of more than 2 percent of its taxable payrolls. However, if an employer has part of a negative balance transferred, the normal tax rates assigned on the next three December 31 rate-computation dates are restricted to not less than 5.4 percent.

Normal Rates Fixed by Statute

Although most firms' normal tax rates are based on their individual experience, there are five categories of employers not assigned tax rates based on the experience rating tax table (see Table 1) and are therefore assigned special rates fixed by law:

(1) Minimum Tax. When the combination of subsidiary tax plus the normal tax is less than 0.3 percent, a minimum tax of 0.3 percent is assigned.

(2) Insufficient period of coverage. A firm that has not been liable for contributions more than a year as of the computation date, and is not delinquent in filing reports, is assigned either the highest normal tax rate applicable to a qualified employer with a positive account balance, or 2.7 percent, whichever is lower.

(3) No remuneration. The tax provision for "insufficient period of coverage" above also applies to firms

* * * * * * * * * * * * *

[3] An amendment to the New York state Unemployment Insurance Law, Article 18, Section 581.1(f), effective December 31, 1986, provides for computing an employer's account percentage by dividing the employer's account balance by the employer's average annual taxable wages of the last three payroll years (ending September 30). Prior to 1986, it was based on the employer's taxable wages of only the last payroll year.

[4] There was a net positive balance of $3,245 million in the Fund at the end of 1988.

that paid no wages[5] in the last payroll year.

(4) Delinquent in reporting. An employer who has not filed all prescribed reports by the computation date, must pay a normal tax rate of 5.4 percent.

(5) Restricted rates. As previously implied, a restricted normal tax rate of 5.4 percent is assigned when, in at least one of the last three prior years, a portion of an employer's negative balance is transferred to the General Account in the Unemployment Insurance Fund.

Normal Elected Rates

By 1989, employers in apparel, construction, and those engaged in processing local fresh fruits and vegetables, no longer had the option to elect special normal rates. This marked the end of the five-year phaseout period of elected rates in New York (years 1985 through 1989) as provided by legislative amendment to the UI Law.[6] In 1988 the elected normal rate for firms (that numbered 8,156) primarily engaged in these industries was 5.0 percent.

Subsidiary Tax Rate

To finance transferred negative balances, the General Account is credited with the interest earned on reserves in the Fund, but the interest alone has not been enough to fully offset the deficits transferred. The law therefore provides that if the year-end balance in the General Account is less than $120 million, all employers liable for unemployment insurance taxes pay a subsidiary tax in the coming year in addition to their normal tax, and the proceeds from the subsidiary tax are credited to the General Account. (There are also other minor credits and charges.) The subsidiary rate (when in effect) varies from 0.1 percent to 1.0 percent, according to the size of the General Account balance, but it cannot increase more than 0.3 percent in any one year. The subsidiary tax rate, if any, is added to an employer's assigned normal unemployment insurance tax rate, (determined by provisions described above). On December 31, 1988 there was a surplus of $418 million[7] in the General Account. As a result, no subsidiary tax was levied on New York State employers in 1989 for the first time in 19 years.

Since unemployment insurance tax rates in New York State for 1989 do not include any subsidiary tax, tax rates discussed in the remainder of this article are composed only of the normal tax.

* * * * * * * * * * * * * *

[5] In 1989 the normal rate for these two groups of employers (insufficient period of coverage and no remuneration) was 2.6 percent, which is the highest normal rate applicable in 1989 to a qualified employer with a positive balance.

[6] Employers in the specified industries had the option of electing a fixed rate of 5.0 percent for 1988 only. By 1989 the elected fixed rates were raised to 5.4 percent, the maximum normal rate. Therefore there would have been no advantage to any employer in having elected a fixed normal rate in 1989. This effectively concluded by 1989 the phaseout of elected rates for these employers.

[7] The General Account surplus of $418,149,000, computed on a cash basis in accordance with the New York State Unemployment Insurance Law, has been used to determine that no subsidiary tax will be levied on New York State employers during calendar year 1989. (In accordance with Generally Accepted Accounting Principles (GAAP), the General Account had a surplus computed as $518,065,000 on December 31, 1988.)

RATE ASSIGNMENTS FOR 1989

On the December 31, 1988 computation date, at least 443,000 employers were assigned tax rates for 1989 (see Table 2). More than 245,000 of these firms had tax rates fixed by statute which ranged from 0.3 to 5.4 percent. This represents an increase of more than 116,000 firms in this category from the year 1988, mainly due to the 115,000 firms that were assigned the minimum rate of 0.3 percent. Prior to 1989 this minimum tax of 0.3 percent had never been applied in New York State's Unemployment Insurance Program. The circumstances leading to the implementation of the minimum tax in 1989 were: (1) the absence of the subsidiary tax, and (2) the lowest tax rate column being in effect for normal tax rates (see Table 1).

Firms whose normal tax rates were fixed by statute (excluding those that paid no wages in the past year) comprised nearly 54 percent of all liable firms but accounted for only 25 percent of the taxable payrolls, primarily because they generally were of smaller than average size, (except for firms in the "restricted" category),[8] and also because the payrolls of newly liable employers covered less than a full year.

Almost 115,000 employers specially taxed at the minimum 0.3 percent rate are those that would have been assessed a rate lower than 0.3 percent from the experience rating tax table (see Table 1) had a lower rate been allowed by law. The minimum tax of 0.3 percent, however, is the lowest unemployment insurance tax rate ever assigned to an employer in New York State since the state's experience rating system was implemented in 1952.

More than 47,000 of the non-qualified firms received restricted rates and represented more than 19 percent of the employers whose normal tax rates were fixed by statute.

Almost 37,000 of the non-qualified firms were delinquent in reporting.

Firms that had been in the UI system less than a year (numbering almost 39,000), and those with no remuneration (fewer than 8,000), were assigned a tax rate of 2.6 percent.

The remaining 197,634 employers were assigned rates for 1989 from the tax table for experience rating (Table 1). More than 16,000 of these firms, (almost 4 percent of all liable firms, accounting for more than 4 percent of taxable payrolls) had negative account balances. Their tax rates ranged from 2.7 percent to the maximum 5.4 percent (see Table 2). Almost 2,100 firms, whose rates were based on their negative account percentage of 17 percent or more, received the maximum rate in 1989.

The 181,000 experience-rated firms that had positive account percentages by the end of 1988 accounted for about 41 percent of all active firms and were the source of over 70 percent of taxable payrolls. Tax rates assigned to these firms for 1989 ranged from 0.3 to 2.6 percent. Of these, more than 7,000 firms qualified for the minimum rate of 0.3 percent.

* * * * * * * * * * * *

[8] The size of a firm is defined by its annual taxable payrolls reported for the 12-month period ending September 30. The average size of firm in the "restricted" category was greater than the average size for all firms receiving tax rates for 1989.

The total number of positive and negative balance firms assigned tax rates on the computation date (December 31, 1988) are shown below. Included, in addition to experience rated firms, are firms whose rates were fixed by statute.

Category	Number of firms	Percent of all active firms
Total-all active firms	443,057	100.0
Positive balance firms	397,025	89.6
Negative balance firms	46,032	10.4

Their taxable payrolls during the 12-month period ending September 30, 1988 were:

Category	Taxable Payrolls	Percent of all active firms
Total-all active firms	$46,373,985,000	100.0
Positive balance firms	$41,235,912,000	88.9
Negative balance firms	$5,138,072,000	11.1

Subsidiary Tax Rates

The subsidiary tax rate, which was 1.0 percent in 1988, was not levied in 1989. A 17 year string of deficits in the General Account ended in 1988 with a positive year-end balance of $418 million. This surplus culminated an eight year recovery from the record deficit of $1,163 million in 1980. Since the surplus on December 31, 1988 was greater than $120 million, a subsidiary tax was not required for New York State employers during 1989.

Tax Rates by Industry and Size

Among the major industry divisions, average 1989 tax rates ranged from 1.35 percent in the finance, insurance, and real estate group to 3.56 percent in mining. Within the major divisions, however, average rates for industry subgroups also varied widely, as indicated in Table 3.

Average tax rates for 1989 by size of firm are shown in Table 5. Employers were classified by size on the basis of their taxable payrolls in the 1988 payroll year. Tax rates averaged lowest for firms with taxable payrolls less than $10,000 or over $10 million and highest for those with taxable payrolls ranging from $100,000 to $999,999.

Tax Rates on Total and Taxable Payrolls

The average tax rate on taxable payrolls for 1989 dropped to 1.88 percent from 2.85 percent in 1988. This represents a drop of almost 1.0 percent due mainly to the drop in the subsidiary tax from 1.0 percent in 1988 to 0.0 percent in 1989. The average effective tax rate on total payrolls declined to 0.53 percent in 1989 from 0.82 percent in 1988.

EXPERIENCE IN 1988 [9]

This section pertains to the 1988 experience of those firms which were active at the end of 1988 and were assigned tax rates for 1989. Taxable payrolls [10] in 1988 were determined by the $7,000 maximum taxable wage base.

Taxable Payrolls in Relation to Total Payrolls by Industry and Size of Firm

Taxable and total payrolls by major industry group and by size of annual taxable payroll are shown in Table 6 for the payroll year ending September 30, 1988. Percentages of total payrolls that were taxable on the $7,000 tax base varied widely among industry groups and also among size groups.

One cause of this variation was the difference in average wage levels among employer groups. Firms with relatively high average wage levels tended to have lower percentages of payrolls that were taxable, on the $7,000 wage base, than firms with lower wage levels.

A second factor, labor turnover, also affected the percentage of payrolls that were taxable. Wages up to $7,000 were taxable if a position in a firm was filled by the same individual all year. If the position was filled by one person part of the year and by another the rest of the year, wages up to $7,000 were taxable for each of the two employees. Thus, the taxable proportion was likely to be greater in firms and industries where there was high turnover.

Table 6 indicates that among industry divisions, finance, insurance, and real estate, mining, and the transportation and public utilities industries had relatively low percentages of payrolls that were taxable in 1988, while the agriculture, forestry and fishing, and public administration industries had the highest percentages.

Also, Table 6 shows a generally downward progression in the average percentage of wages taxable, as the size of the firm increases. In the 1988 payroll year, these averages ranged from more than 39 percent for firms with taxable payrolls between $10,000 and $25,000 down to about 20 percent for those in the $25 million-and-over bracket.

---

[1] An employer's account percentage is the December 31 balance in the employer's account in the Unemployment Insurance Fund as a percentage of the employer's average yearly taxable wages in the last three payroll years (ending September 30).

[2] The Size-of-Fund Index is the moneys in the Fund on December 31, as a percentage of all taxable wages in the last payroll year, or as a percentage of the annual average of the taxable wages of the last three payroll years, whichever percentage is less.

[3] The U.I. Law specifies that an employer must pay at least 0.3 percent combined normal and subsidiary tax. If in any year, 0.3 percent exceeds the sum of the subsidiary tax rate and the employer's rate from this table, the additional amount paid is credited to the employer's account.

---

[1] Tax rates for 1989 include only the normal component, because no subsidiary tax was levied on employers.

[2] Accounts of firms that are liable for unemployment insurance tax contributions.

[3] Taxable payrolls for the 12-month period ending September 30, 1988.

[4] Before transfer to the General Account of portions of individual negative account balances that exceeded 2 percent of the employer's taxable payroll.

[5] Represents an average tax rate weighted on taxable payrolls in a combined class of firm or account percentage group.

[6] Firms that had parts of negative balances transferred to the General Account within the last three years.

NOTE: Details may not add to totals because of rounding.

Table 3. AVERAGE UNEMPLOYMENT INSURANCE TAX RATES BY DETAILED INDUSTRY CLASSIFICATION, NEW YORK STATE, 1989

Industry division and group [1]	Number of employer accounts 1989 [2]	Average tax rate [3]
All industries	443,057	1.88
Goods producing	73,400	2.41
Manufacturing	28,360	2.03
Durable goods	12,509	1.83
Metals and machinery	7,471	1.69
Primary metal industries	345	2.69
Fabricated metal products	1,967	2.16
Industrial machinery and equipment	2,523	1.50
Electronic and other electrical equipment	1,294	2.18
Transportation equipment	455	1.89
Instruments and related products	887	1.07

Transportation and public utilities	1.58	2.56	2.62	0.39	0.63	0.67
Wholesale and retail trade	1.64	2.61	2.75	0.59	0.96	1.06
Finance, insurance and real estate	1.35	2.17	2.18	0.26	0.41	0.46
Services	1.86	2.84	2.96	0.58	0.93	1.02
Public administration	1.42	2.52	2.61	0.64	1.19	1.28

[1] The 1987 and 1988 industry divisions and groups are classified in accordance with the 1972/77 edition of the *Standard Industrial Classification Manual*. The 1989 industry divisions and groups are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual*. The average tax rate for "All industries" combined includes firms not classified industrially.

[2] Average rates for 1987 and 1988 include subsidiary tax of 1.0 percent on taxable payrolls.

[3] Average rates on $7,000 base.

Table 5. AVERAGE UNEMPLOYMENT INSURANCE TAX RATES BY SIZE OF FIRM NEW YORK STATE, 1987 - 1989

Size of annual taxable payroll [1]	Number of employer accounts 1989 [2]	Average tax rates [3]		
		1989	1988	1987
All accounts	443,057	1.88	2.85	2.95
Under $10,000	146,948	1.77	2.69	2.86
$10,000- 24,999	108,769	1.79	2.72	2.89
25,000- 49,999	74,813	1.90	2.86	3.00
50,000- 99,999	51,045	2.07	3.04	3.20
100,000- 249,999	36,365	2.22	3.26	3.41
250,000- 499,999	13,094	2.32	3.37	3.52
500,000- 999,999	6,546	2.30	3.34	3.44
1,000,000- 2,499,999	3,591	2.08	3.11	3.22
2,500,000- 4,999,999	1,082	1.98	2.95	3.02
5,000,000- 9,999,999	480	1.84	2.76	2.88
10,000,000-24,999,999	211	1.52	2.42	2.54
25,000,000 and over	113	0.99	1.90	1.89

[1] Taxable payrolls are for the 12-month period ending September 30, 1988.

[2] Accounts of firms that are liable for unemployment insurance tax contributions as of December 31, 1988.

[3] Average tax rates on taxable payrolls are on the $7,000 maximum taxable wage base. Average rates in 1987 and 1988 include a subsidiary tax of 1.0 percent on taxable wages. In 1989 no subsidiary tax was levied on employers.

Table 6. UNEMPLOYMENT INSURANCE TAXABLE AND TOTAL PAYROLLS BY INDUSTRY AND SIZE OF FIRM, NEW YORK STATE, TWELVE MONTHS ENDING SEPTEMBER 30, 1988

(Amount in thousands)

Industry and size of annual taxable payroll	Taxable payrolls [1]	Total payrolls [1]	Taxable as percent of total
Total	$46,373,985	$157,621,060	29.4

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1989 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly Statistical Report and a Quarterly Analytical Report. The monthly statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties. The quarterly analytical report describes current trends in resident employment, unemployment, employment by industry and other labor market information for 11 major labor areas.

3. **Occupational Supply and Demand.** Discusses local and regional economic trends and implications for the future. Covers causes and solutions to today's tightening labor market, labor force projection to the year 2000, education and training programs, demand occupations and occupational projections. Reports are available for selected major areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1990-1992.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

8. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and mandays idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Reports 16, 17, 19 and/or 20 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Physical Therapist, Medical Assistant, Corrections Officer, Computer Programmer, Occupational Therapist, and Home Care Aide.

12. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

15. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

16. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

17. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

SPECIAL REPORTS--continued

18. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information. 52 pages.

19. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

20. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1990.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

89-3. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1987.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1987.

89-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1988.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

MONTH IN REVIEW
DECEMBER 1990

Civilian Labor Force

The state unemployment rate increased by 0.1 of a percentage point from November to 5.4 percent in December 1990 reflecting a slight rise in unemployment and a decline in employment. At 62.0 percent, the civilian labor force participation rate (the proportion of the working age population in the labor market) was at its lowest for December since 1987. Participation waned noticeably in the last quarter of year. One year ago, 223,000 more New Yorker's were in the labor force (either working or looking for work). In December 1989 the unemployment rate was 5.5 percent.

The comparable national jobless rate (not seasonally adjusted) increased by 0.1 of a percentage point to 5.9 percent in December as the slowdown in the economy deepened. The nation's unemployment rate was 0.8 of a percentage point higher than it was one year ago.

Total unemployment inched up 14,000 over the month to 466,000. Since December 1989, unemployment has decreased by 16,000. However, in view of the significant over-the-year employment loss, many persons either are no longer looking for work or have left New York State.

On an annual average basis, the state jobless rate came in at 5.2 percent for 1990, up 0.1 of a percentage point from 1989. The nation's unemployment rate averaged 5.5 percent in 1990, or 0.2 of a percentage point higher than in 1989.

Nonfarm Employment

Job market conditions in New York during 1990 were at their worst in December as the number of nonfarm jobs (which exclude agricultural workers, the self employed, unpaid family workers and domestic workers in private households) declined uncharacteristically by 16,100 from November 1990 to 8,263,800. A decline in the job count in December is rare. The state last experienced such a decline in 1981.

Normally at this time of year the seasonal job losses in construction and manufacturing employment are offset by seasonal hiring in retail trade. This year the seasonal layoffs in manufacturing (-10,200) and construction (-13,700) occurred as usual but hiring in retail trade (+8,500) was only a fraction of the usual holiday buildup. In addition, employment in finance, insurance and real estate and government declined slightly, falling 1,900 and 600, respectively. Factory job losses were widespread among both durable and nondurable-goods producers. Similarly, all types of construction activity slowed. The decline in government jobs reflected a reduction in state government employment.

Employment in the services division increased slightly--rising 2,400--roughly in line with past-December performances. Gains in health, social, management consulting and business services caused the increase. Hiring by trucking companies caused a small increase in the number of transportation and public utility jobs, up 1,900.

Compared with a year ago, nonfarm employment in the state was lower by 126,400 or 1.5 percent. The December 1989-December 1990 decline was the worst over-the-year job loss since December 1975.

The over-the-year job decrease was led by losses in trade (-71,000) and manufacturing (-60,500), followed by lesser decreases in construction (-37,500) and finance, insurance and real estate (-24,000). The downward slide in employment was slowed by job increases in services (+48,500), government (+13,500), and transportation and public utilities (+4,900).

UNEMPLOYMENT INSURANCE TAX RATES, 1990

Elias D. Loizides

HIGHLIGHTS

- Assignments of 1990 normal tax rates to firms qualified for experience rating were made from the lowest tax rates column (seventh from the left) in Table 1. The Size-of-Fund was 6.6 percent on December 31, 1989. This index is used to determine the tax column in effect and resulted in the lowest column of rates to remain in effect for 1990.

- On December 31, 1989 the General Account balance was a surplus of $394 million. Since this balance was in excess of $120 million, no subsidiary tax was levied on employers in New York State for the 1990 calendar year.

- Unemployment Insurance (UI) tax rates for 1990 averaged 1.93 percent of taxable payrolls.

- Among the major industry divisions,[1] average 1990 tax rates were highest in construction, and were lowest in public administration.

- Firms with taxable payrolls under $10,000 or over $10 million had the lowest average UI tax rates in 1990, while rates averaged highest among employers with taxable payrolls in the $100,000 to $999,999 range.

PROVISIONS FOR RATE ASSIGNMENT

Under the current New York State system, covered employers pay unemployment insurance taxes on the first $7,000 of wages that they pay to each of their employees during the calendar year.[2] These taxes are pooled in an Unemployment Insurance (UI) Fund, from which benefits are paid to all eligible unemployed workers.

An employer's tax rate is composed of two parts:

(1) a normal rate, which may be based on both the employer's experience with unemployment and the level of reserves in the UI Trust Fund, and

(2) a subsidiary rate, which is the same for all employers, and is determined by the year-end balance in the General Account.

Normal Experience-Based Rates

To vary employers' normal tax rates according to the incidence of unemployment among their workers (often referred to as "experience rating"), a bookkeeping account is set up within the Unemployment Insurance Fund for each covered employer. An employer's normal taxes are credited, and chargeable benefits paid to an employer's unemployed workers are debited to the employer's individual account. On December 31, the computation date for experience rating, an account balance is computed as a percentage of the employer's annual average taxable wages of the last three payroll years, and this "account percentage" is the measure of experience on which one's normal tax rate for the next year is based. An account percentage may be

* * * * * * * * * * * * * *

[1] Major industry groups as defined in the 1987 edition of the Standard Industrial Classification *(SIC)* Manual.

[2] Covered local governments and nonprofit organizations may elect to reimburse the Unemployment Insurance Fund for benefits paid former employees, instead of paying taxes; the State of New York also reimburses the Fund for benefits.

positive or negative depending on whether the account showed a positive or negative balance at the end of the year.

Once an account percentage has been computed, the employer's normal tax rate is read from the tax table for experience rating shown in Table 1. The seven columns in the tax table show seven alternative rate schedules, only one of which is applicable in a given year. The appropriate schedule depends on the level of reserves in the Unemployment Insurance Fund--the higher the reserves, the lower the scale of rates. The measure of reserve level used for selecting the proper rate column is the Size-of-Fund Index,which is computed by expressing total year-end reserves as a percentage of the combined taxable wages of all liable firms. On December 31, 1989, the Index stood at 6.6 percent;[3] therefore the seventh column (from the left)of normal rates in the table applied for 1990. Rates in this column range from 0.0 percent to 5.4 percent.

Following the assignment of normal tax rates for the coming year (but as of the same computation date), if the balance in an employer's account is negative and the amount of the negative account balance is greater than 2 percent of the employer's annual taxable wages, then the amount in excess of 2 percent of the employer's taxable wages is transferred as a charge to the General Account in the Unemployment Insurance Fund, (see the section on "Subsidiary Tax Rate"). Thus, no firm starts the next year with a deficit of more than 2 percent of its taxable payrolls. However, if an employer has part of a negative balance transferred, the normal tax rates assigned on the next three December 31 rate-computation dates are restricted to not less than 5.4 percent.

Normal Rates Fixed by Statute

Although most firms' normal tax rates are based on their individual experience, there are five categories of employers not assigned tax rates based on the experience rating tax table (see Table 1) and are therefore assigned special rates fixed by law:

Minimum tax. When the combination of subsidiary tax plus the normal tax is less than 0.3 percent, a minimum tax of 0.3 percent is assigned.

Insufficient period of coverage. A firm that has not been liable for contributions more than a year as of the computation date, and is not delinquent in filing reports, is assigned either the highest normal tax rate applicable to a qualified employer with a positive account balance, or 2.7 percent, whichever is lower.

No remuneration. The tax provision for "insufficient period of coverage" above also applies to firms that paid no wages[4] in the last payroll year.

Delinquent in reporting. An employer who has not filed all prescribed reports by the computation date, must pay a normal tax rate of 5.4 percent.

Restricted rates. As previously implied, a restricted normal tax rate of 5.4 percent is assigned when, in at least one of the last three prior years, a portion of an employer's negative balance is transferred to the General Account in the Unemployment Insurance Fund.

Subsidiary Tax Rate

To finance transferred negative balances, the General Account is credited with the interest earned on reserves in the Fund, but the interest alone has not been enough to fully offset the deficits transferred. The law therefore provides that if the year-end

* * * * * * * * * * * *

[3] There was a net positive balance of $3,139 million in the Fund at the end of 1989.

[4] In 1990 the normal rate for these two groups of employers *(insufficient period of coverage and no remuneration)* was 2.6 percent, which is the highest normal rate applicable in 1990 to a qualified employer with a positive balance.

balance in the General Account is less than $120 million, all employers liable for unemployment insurance taxes pay a subsidiary tax in the coming year in addition to their normal tax, and the proceeds from the subsidiary tax are credited to the General Account. (There are also other minor credits and charges.) The subsidiary rate (when in effect) varies from 0.1 percent to 1.0 percent, according to the size of the General Account balance, but it cannot increase more than 0.3 percent in any one year. The subsidiary tax rate, if any, is added to an employer's assigned normal unemployment insurance tax rate, (determined by provisions described above). On December 31, 1989 there was a surplus of $394 million[5] in the General Account. As a result, 1990 was the second consecutive year in which there was no subsidiary tax levied on New York State employers. On only one occasion prior to this did New York State employers have two consecutive years with no subsidiary tax, 1959 and 1960.

Since the 1990 New York State Unemployment Insurance tax does not include any subsidiary tax, the tax rates analysed in the remainder of this article are composed of only the normal tax.

* * * * * * * * * * * *

[5] The General Account surplus of $393,651,000, computed on a cash basis in accordance with the New York State Unemployment Insurance Law, has been used to determine that no subsidiary tax will be levied on New York State employers during calendar year 1990. *(In accordance with Generally Accepted Accounting Principles (GAAP), the General Account had a surplus computed as $456,180,000 on December 31, 1989.)*

RATE ASSIGNMENTS FOR 1990

On the December 31, 1989 computation date, nearly 447,000 employers were assigned tax rates for 1990 (see Table 2). More than 242,000 of these firms had tax rates fixed by statute (instead of being based on the experience rating tax table). These rates ranged from 0.3 to 5.4 percent. This represents a drop of almost 3,400 firms in this category from the year 1989. Prior to 1989 the minimum tax of 0.3 percent had never been applied in New York State's Unemployment Insurance Program. The circumstances leading to the implementation of the minimum tax in 1989 and in 1990 were: (1) the absence of the subsidiary tax, and (2) the lowest tax rate column being in effect for normal tax rates (see Table 1).

Firms whose normal tax rates were fixed by statute (excluding those that paid no wages in the past year) comprised more than 52 percent of all liable firms but accounted for less than 23 percent of the taxable payrolls, primarily because they generally were of smaller than average size, (except for firms in the "restricted" category),[6] and also because the payrolls of newly liable employers covered less than a full year.

The 116,000 employers specially taxed at the minimum 0.3 percent rate would have been assessed a rate lower than 0.3 percent from the experience rating tax table (see Table 1) had a lower rate been allowed by law. The minimum tax of 0.3 percent, however, is the lowest unemployment insurance tax rate ever assigned to an employer in New York State since the state's experience rating system was implemented in 1952.

Almost 44,000 of the nonqualified firms received restricted rates and represented about 18 percent of the employers whose normal tax rates were fixed by statute.

More than 36,000 of the nonqualified firms were delinquent in reporting.

Firms that had been in the UI system less than a year (numbering more than 38,000), and those with no remuneration (fewer than 8,000), were assigned a tax rate of 2.6 percent.

The remaining 204,767 employers were assigned rates for 1990 from the tax table for experience rating (Table 1). More than 20,000 of these firms, (almost 5 percent of all liable firms, accounting for more than 7 percent of taxable payrolls) had negative account balances. Their tax rates ranged from 2.7 percent to the maximum 5.4 percent (see Table 2). Of these, more than 2,700 firms, whose rates were based on their negative account percentage of 17 percent or more, received the maximum rate in 1990.

The 184,571 experience-rated firms that had positive account percentages by the end of 1989 accounted for more than 41 percent of all active firms and were the source of about 70 percent of taxable payrolls. Tax rates assigned to these firms for 1990 ranged from 0.3 to 2.6 percent. Of these, almost 7,000 firms qualified for the minimum rate of 0.3 percent.

* * * * * * * * * * * * * *

[6] The size of a firm is defined by its annual taxable payrolls reported for the 12-month period ending September 30. The average size of firm in the "restricted" category was greater than the average size for all firms receiving tax rates for 1990.

The total number of positive and negative balance firms assigned tax rates on the computation date (December 31, 1989) are shown below. Included, in addition to experience rated firms, are firms whose rates were fixed by statute.

Category	Number of firms	Percent of all active firms
Total-all active firms	446,828	100.0
Positive balance firms	396,771	88.8
Negative balance firms	50,057	11.2

Their taxable payrolls during the 12-month period ending September 30, 1989 were:

Category	Taxable payrolls	Percent of all active firms
Total-all active firms	$46,811,928,000	100.0
Positive balance firms	$40,265,528,000	86.0
Negative balance firms	$6,546,400,000	14.0

Subsidiary Tax Rates

As in 1989, no subsidiary tax is being levied on covered employers in New York State during 1990, because the General Account balance[7] on December 31, 1989 was greater than $120 million.

Tax Rates by Industry and Size

Among major industry divisions, average 1990 tax rates ranged from 1.37 percent in public administration to 3.57 percent in construction. Within major divisions, however, there was even greater variation of average tax rates for industry subgroups, as indicated in Table 3. The rates ranged from 0.5 percent in electric, gas, and sanitary services to 4.67 percent for heavy construction contractors.

Average 1990 tax rates by size of firm are shown in Table 5. Employers were classified by size on the basis of their taxable payrolls in the 1989 payroll year. Tax rates averaged lowest for firms with taxable payrolls less than $10,000 or over $10 million and highest for those with taxable payrolls ranging from $100,000 to $999,999.

Tax Rates on Total and Taxable Payrolls

The average tax rate on taxable payrolls rose to 1.93 percent in 1990 from 1.88 percent in 1989. This represents an increase of 0.05 percentage points for 1990, mainly because benefits charged exceeded revenues credited to accounts in the UI Fund during calendar year 1989, which in turn caused many employers'account percentages to shift into higher tax rate

* * * * * * * * * * * *

[7] A 17 year string of deficits in the General Account ended in 1988 with a positive year-end balance of $418 million. This surplus culminated an eight year recovery from the record deficit of $1,163 million in 1980. In 1989 the year-end balance in the General Account was a surplus of $394 million.

brackets.[8] In spite of the increase in the average tax rate on taxable payrolls, the average effective tax rate on total payrolls declined to 0.51 percent in 1990 from 0.53 percent in 1989, because average total wages increased while the maximum taxable wage base remained constant at $7,000 during 1989.

EXPERIENCE IN 1989 [9]

This section pertains to the 1989 experience of those firms which were active at the end of 1989 and were assigned tax rates for 1990. Taxable payrolls [10] in 1989 were determined by the $7,000 maximum taxable wage base.

Taxable Payrolls in Relation to Total Payrolls by Industry and Size of Firm

Taxable and total payrolls by major industry group and by size of annual taxable payroll are shown in Table 6 for the payroll year ending September 30, 1989. Percentages of total payrolls that were taxable on the $7,000 tax base varied widely among industry groups and also among size groups.

One cause of these variations was the differences in average wage levels among employer groups. Firms with relatively high average wage levels tended to have lower percentages of payrolls that were taxable, on the $7,000 wage base, than firms with lower wage levels.

A second factor, labor turnover, also affected the percentage of payrolls that were taxable. Wages up to $7,000 were taxable if a position in a firm was filled by the same individual all year. If the position was filled by one person part of the year and by another the rest of the year, wages up to $7,000 were taxable for each of the two employees. Thus, the taxable proportion was likely to be greater in firms and industries where there was high turnover.

Table 6 indicates that among industry divisions, finance, insurance, and real estate, mining, and the transportation and public utilities industries had relatively low percentages of payrolls that were taxable in 1989, while the agriculture, forestry and fishing, and public administration industries had the highest percentages.

Also, Table 6 shows a generally downward progression in the average percentage of wages taxable, as the size of the firm increases. In the 1989 payroll year, these averages ranged from almost 37 percent for firms with taxable payrolls between $10,000 and $25,000 down to less than 20 percent for those in the $25 million-and-over bracket.

* * * * * * * * * * * *

[8] Total benefits charged to employer accounts in the UI Fund increased during 1989 partly because of a greater number of insured unemployed and also because the maximum weekly benefit rate was raised from $180 to $245 effective on or after April 17, 1989. *(The maximum benefit rate was then raised to $260 effective on or after April 16, 1990, and will be raised to $280 effective on or after April 15, 1991, and then to $300 effective on or after February 3, 1992.)* While total benefits increased, revenues decreased in calendar year 1989 mainly because of lower contributions paid by employers in 1989 due to lower tax rates being in effect as compared to calendar year 1988. *(The subsidiary tax rate in 1989 was 0.0 percent while in 1988 it was 1.0 percent)*

[9] Data by more detailed industry classifications, including data on contributions paid and benefits charged, will be included in a forthcoming bulletin, New York State Unemployment Insurance Tax Rates, 1990.

[10] Payrolls, shown on Tables 2 and 6 in this article are for the 12-month period ending September 30, 1989, and are on the $7,000 maximum-taxable-wage base.

---

[1] An employer's account percentage is the December 31 balance in the employer's account in the Unemployment Insurance Fund as a percentage of the employer's average yearly taxable wages in the last three payroll years (ending September 30).

[2] The Size-of-Fund Index is the moneys in the Fund on December 31, as a percentage of all taxable wages in the last payroll year, or as a percentage of the annual average of the taxable wages of the last three payroll years, whichever percentage is less.

[3] The U.I. Law specifies that an employer must pay at least 0.3 percent combined normal and subsidiary tax. If in any year, 0.3 percent exceeds the sum of the subsidiary tax rate and the employer's rate from this table, the additional amount paid is credited to the employer's account.

---

[1] Tax rates for 1990 include only the normal component, because no subsidiary tax was levied on employers.

[2] Accounts of firms that are liable for unemployment insurance tax contributions.

[3] Taxable payrolls for the 12-month period ending September 30, 1989.

[4] Before transfer to the General Account of portions of individual negative account balances that exceeded 2 percent of the employer's taxable payroll.

[5] Represents an average tax rate weighted on taxable payrolls in a combined class of firm or account percentage group.

[6] Firms that had parts of negative balances transferred to the General Account within the last three years.

NOTE: Details may not add to totals because of rounding.

Table 3. AVERAGE UNEMPLOYMENT INSURANCE TAX RATES BY DETAILED INDUSTRY CLASSIFICATION, NEW YORK STATE, 1989-1990

Industry division and group [1]	Number of employer accounts 1990 [2]	Average tax rate [3]	
		1990	1989
All industries	446,828	1.93	1.88

Mining	3.47	3.56	4.73	0.79	0.72	0.97
Construction	3.57	3.50	4.50	1.13	1.17	1.56
Service producing	1.74	1.67	2.61	0.47	0.48	0.76
Agriculture, forestry and fishing	2.81	2.86	3.96	1.27	1.41	2.02
Transportation and public utilities	2.02	1.58	2.56	0.46	0.39	0.63
Wholesale and retail trade	1.66	1.64	2.61	0.58	0.59	0.96
Finance, insurance, and real estate	1.43	1.35	2.17	0.25	0.26	0.41
Services	1.87	1.86	2.84	0.57	0.58	0.93
Public administration	1.37	1.42	2.52	0.60	0.64	1.19

[1] Firms assigned tax rates during 1988 were classified in accordance with the 1972/77 edition of the *Standard Industrial Classification Manual*. During 1989 and 1990 firms were classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual*. The average tax rate for "All industries" combined includes firms not classified industrially.

[2] Average rates for 1988 include a subsidiary tax of 1.0 percent on taxable payrolls.

[3] Average rates on $7,000 base.

[4] Average effective tax rates on total payrolls for 1990 are estimated and may be revised.

Table 5. AVERAGE UNEMPLOYMENT INSURANCE TAX RATES BY SIZE OF FIRM NEW YORK STATE, 1988 - 1990

Size of annual taxable payroll [1]	Number of employer accounts 1990 [2]	Average tax rates [3]		
		1990	1989	1988
All accounts	446,828	1.93	1.88	2.85
Under $10,000	147,689	1.75	1.77	2.69
$10,000- 24,999	110,222	1.79	1.79	2.72
25,000- 49,999	75,439	1.88	1.90	2.86
50,000- 99,999	51,340	2.04	2.07	3.04
100,000- 249,999	36,617	2.21	2.22	3.26
250,000- 499,999	13,401	2.34	2.32	3.37
500,000- 999,999	6,582	2.30	2.30	3.34
1,000,000- 2,499,999	3,635	2.15	2.08	3.11
2,500,000- 4,999,999	1,089	2.03	1.98	2.95
5,000,000- 9,999,999	492	1.82	1.84	2.76
10,000,000-24,999,999	210	1.56	1.52	2.42
25,000,000 and over	112	1.20	0.99	1.90

[1] Taxable payrolls are for the 12-month period ending September 30, 1989.

[2] Accounts of firms that are liable for unemployment insurance tax contributions as of December 31, 1989.

[3] Average tax rates on taxable payrolls are on the $7,000 maximum taxable wage base. Average rates in 1988 include a subsidiary tax of 1.0 percent on taxable wages. In 1989 and 1990 no subsidiary tax was levied on employers.

Chartbook of New York State Economy

- Jobs
- Unemployment
- Participation

Prepared by

Vincent F. DeSantis
State Labor Market Analyst

and

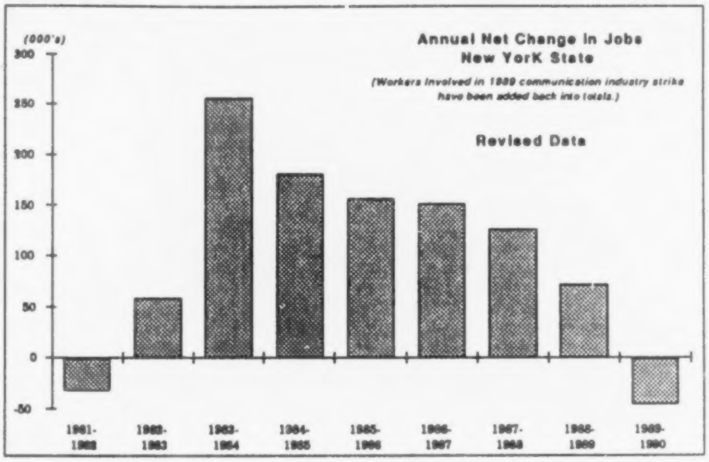
Vivian Prysiazniuk
Student Intern

February 1991

THE EIGHTIES-SUCCESS OR EXCESS ?

From 1982 to 1989, New York State experienced an unprecedented peace-time expansion, adding over one million jobs, with employment expanding for seven years in a row. By the end of 1989, this expansion was over. the current economic downturn has already surpassed the number of jobs lost in the last recession.

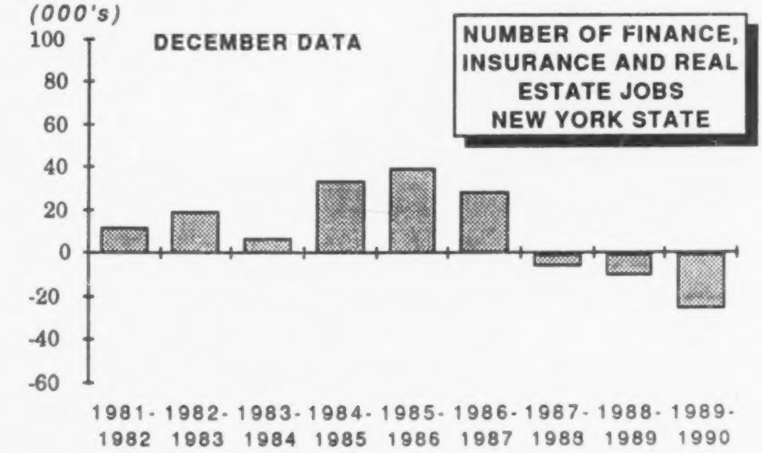
Chart 1.



Finance, insurance and real estate

Employment in finance, insurance and real estate declined after growing vigorously for most of the 1980's. High interest rates, mounting problems in the banking industry and continuing fallout from the 1987 stock market crash combined to push employment lower in these sectors.

Chart 2.

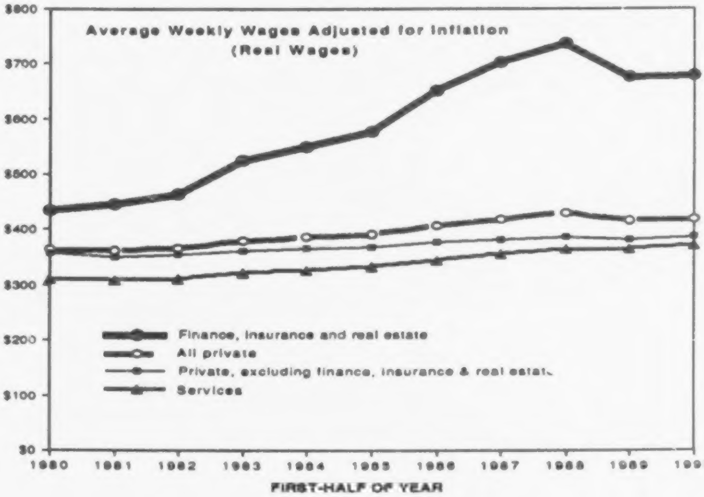


DECEMBER DATA

Real wages

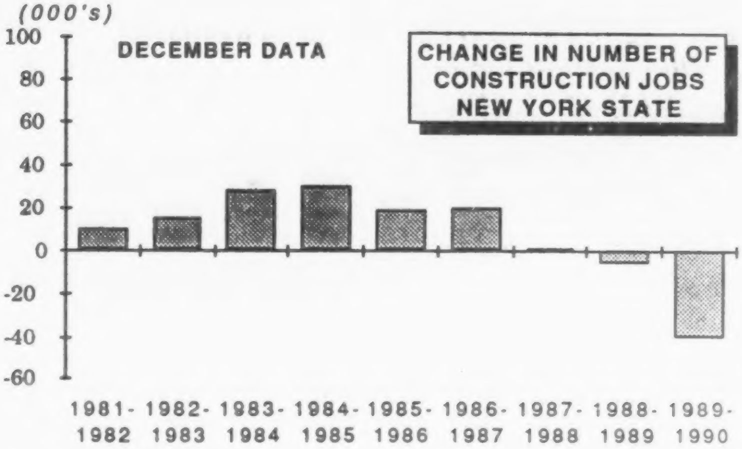
Adjusted for inflation, wages in finance showed impressive gains in the 1980's, although they have recently declined. Meanwhile, wages in other industries made negligible advances in real wages.

Chart 3.



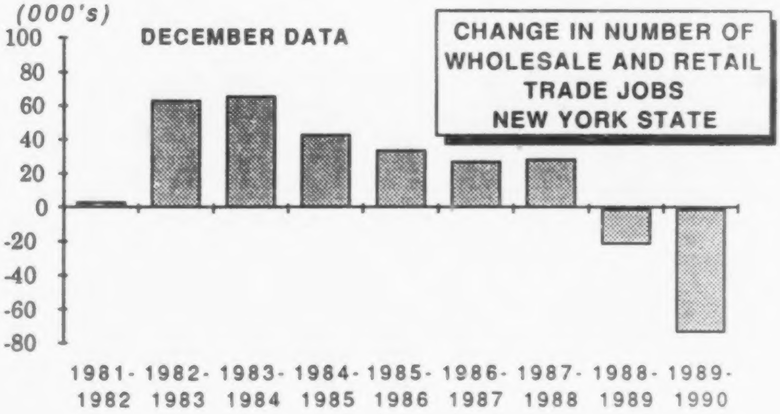
Construction
Thrift and banking industry problems, fallout from the stock market crash and high interest rates have left their mark on the construction industry.

Chart 4.



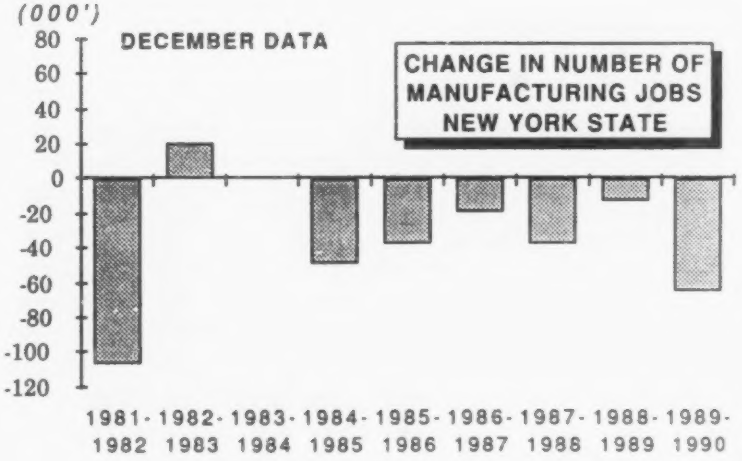
Wholesale and retail trade
Consumers are wary and retailers are trying to lower costs in order to handle their debt burden so employment in wholesale and retail trade is down. Trade employment has not faltered this badly since 1975.

Chart 5.



Manufacturing
Recent job losses in manufacturing have been across the board. Virtually no manufacturing industry was spared.

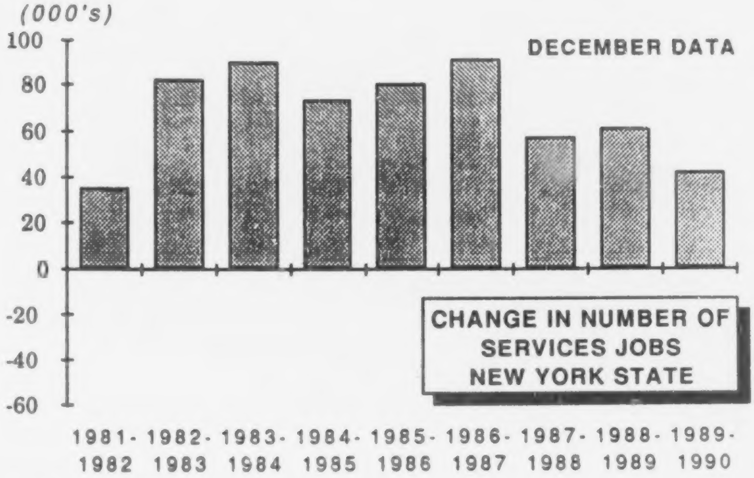
Chart 6.



Services

In 1990, services was easily the largest provider of new jobs due to growing demand for health, social, and amusement and recreation services. Job growthwas dampened considerably in the usually robust business and professional services.

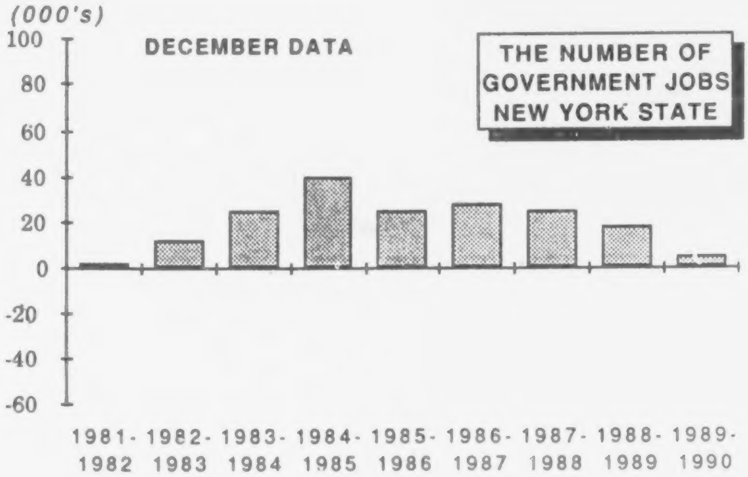
Chart 7.



Government

Most of the growth in government employment has occurred in local government. Government employment is expected to decline in 1991.

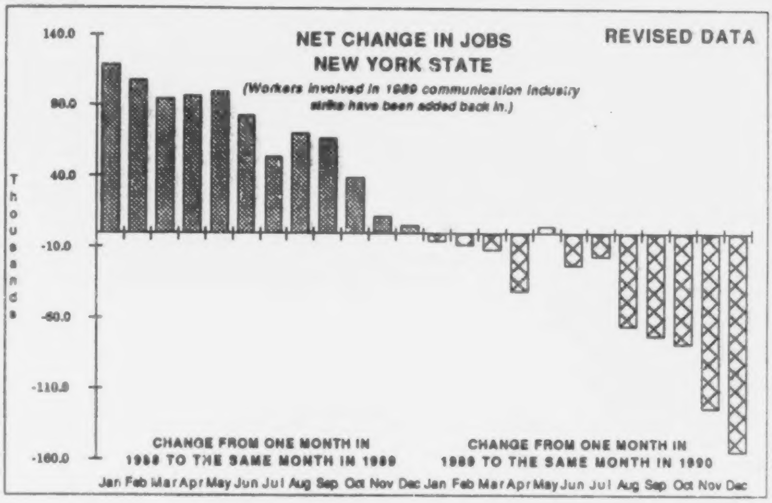
Chart 8.



JOB LOSSES ARE MOUNTING

NEW YORK STATE
Job growth began to slow noticeably during the last half of 1989, especially the last quarter of the year. By January 1990, the number of jobs in the State had stopped expanding over the year. Job losses mounted rapidly during the last quarter of 1990.

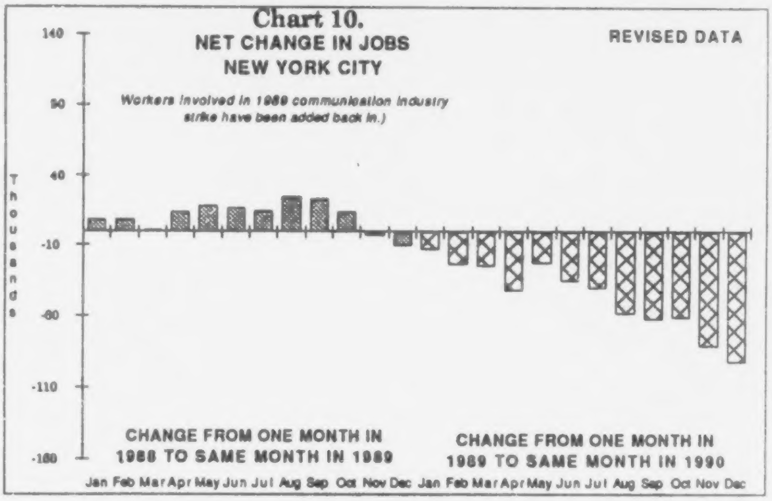
Chart 9.



NEW YORK CITY
The State's job losses in 1990 were concentrated in New York City.

Over-the-year job losses in New York City were first evident as early as November 1989. Since then, the over-the-year job loss has become increasingly worse.

Chart 10.



BALANCE OF STATE
Westchester and Nassau-Suffolk areas also were hard hit in 1990. Upstate New York experienced slow job growth during the last quarter of 1989 and most of 1990. In the last quarter of 1990 many Upstate areas were experiencing year-to-year job losses for the first time. By December 1990, the Upstate New York economy had cooled noticeably and job growth had come to a halt in all but a few areas, most notably Albany-Schenectady-Troy and Syracuse.

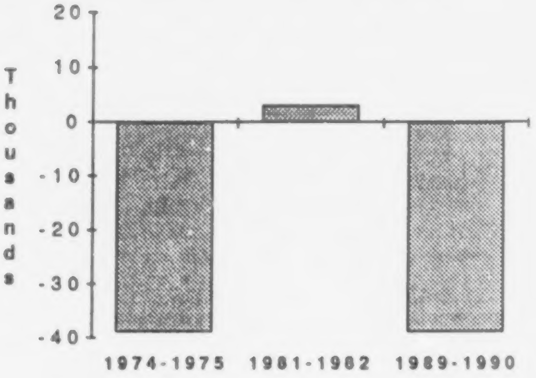
WHOLESALE AND RETAIL TRADE



NEW YORK COMPARED WITH THE NATION

Chart 18.

The Nation has lost over a million jobs since June 1990.

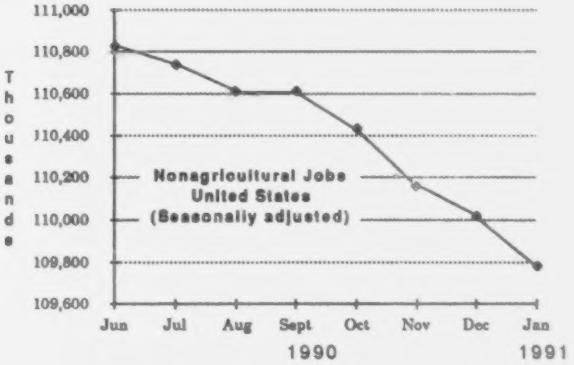


Chart 19.

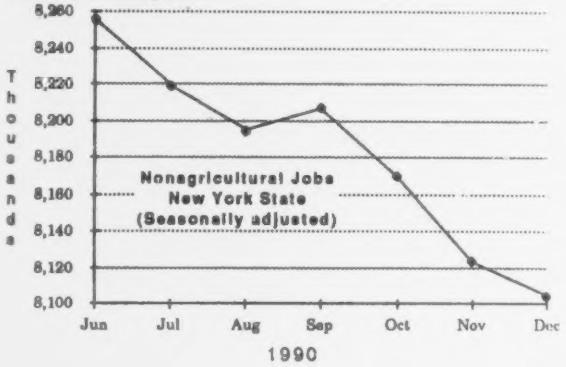
The State has lost nearly 160,000 jobs since June. More losses are anticipated.



SELECTED JOBS GAINERS AND JOB LOSERS: DECEMBER 1989 TO DECEMBER 1990

While nearly every manufacturing industry declined in employment over the year, a handful increased. Many nonmanufacturing industries are experiencing job losses for the first time in years.

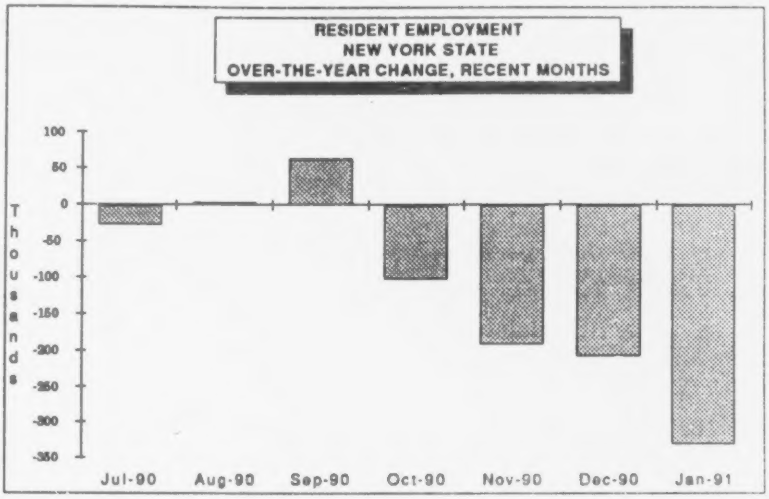
Job gains were concentrated in industies that provide care for, or help to, individuals.

Job gainers	Percent Change
Manufacture of engines and turbines	6.8
Motion pictures	5.7
State government education	4.7
Manufacture of industrial organic chemicals	4.2
Social services	4.1
Trucking and warehousing	3.5
Private hospitals	3.2
Nursing and personal care	2.7
Engineering and management services	1.3
Business services	0.8
Manufacture of paper and paper products	0.5
Job losers	
Manufacturing, nearly everything including:	
Toy and sporting goods	-23.5
Footwear, except rubber	-18.4
Motor vehicle equipment	-16.5
Electric lighting and wiring	-10.8
Textile mill products	-7.9
Newspapers	-6.6
Stone, clay and class products	-6.0
Computers and office equipment	-5.7
Nonmanufacturing:	
Special trade contractors	-10.9
Department stores	-9.4
Security brokers and dealers	-9.2
Commercial banks	-6.9
State government hospitals	-5.6
Savings institutions	-4.2
U. S. Postal Service	-2.6
Telephone and telegraph	-1.9
Private educational services	-0.6

HOUSEHOLD DATA

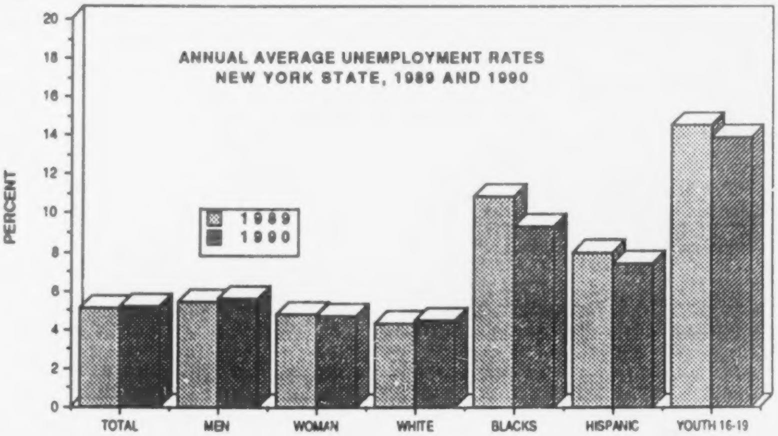
Resident employment
Resident employment has declined sharply in recent months...

Chart 20.



Unemployment rates
Unemployment rates for minorities and youth declined from 1989 to 1990 but...

Chart 21.



Participation
their labor force participation fell as well.

Chart 22.

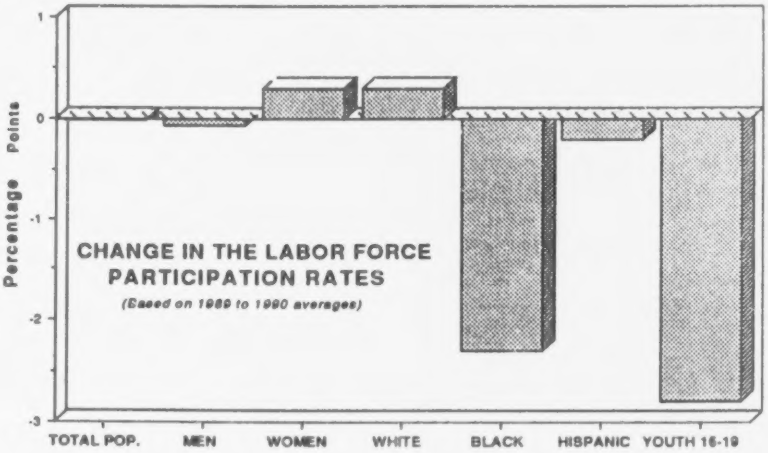


Chart 22.

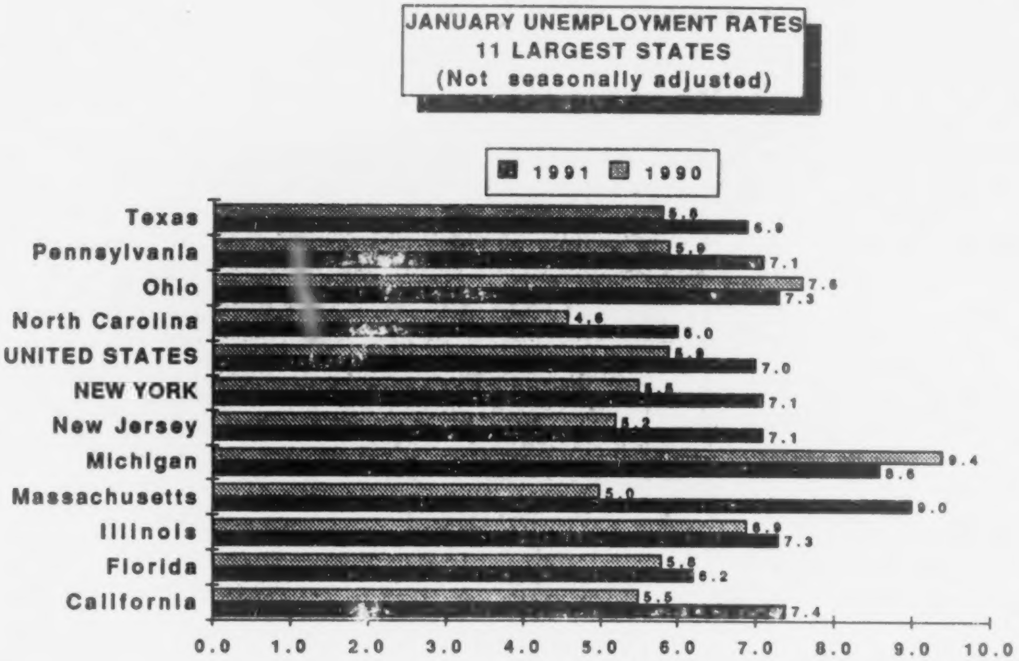


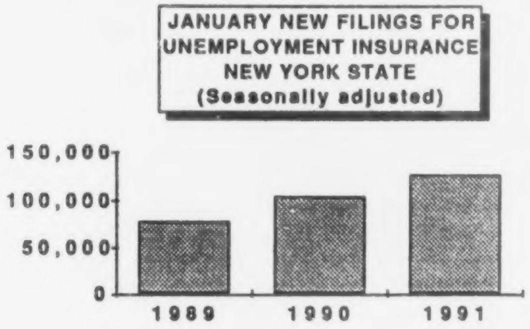
Unemployment rates for large states

In January 1991, nine of the nation's 11 largest states had higher unemployment rates than one year earlier. The nation's unemployment rate was up over the year as well.

New filings for unemployment insurance

New filing for unemployment insurance have risen sharply in the last few years.

Chart 22.



Unemployment insurance beneficiaries by broad occupation group

Unlike past recessions, many white collar workers have been laid off during the ongoing downturn. Nonetheless, most of the unemployment insurance beneficiaries continue to be blue collar workers. Although few in number, service worker beneficiaries have increased faster than either white or blue collar beneficiaries.

Chart 23.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1989 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly Statistical Report and a Quarterly Analytical Report. The monthly statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties. The quarterly analytical report describes current trends in resident employment, unemployment, employment by industry and other labor market information for 11 major labor areas.

3. **Occupational Supply and Demand.** Discusses local and regional economic trends and implications for the future. Covers causes and solutions to today's tightening labor market, labor force projection to the year 2000, education and training programs, demand occupations and occupational projections. Reports are available for selected major areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1990-1992.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

8. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and mandays idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Reports 16, 17, 19 and/or 20 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Physical Therapist, Medical Assistant, Corrections Officer, Computer Programmer, Occupational Therapist, and Home Care Aide.

12. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

15. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

16. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

17. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

SPECIAL REPORTS--continued

18. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 52 pages.

19. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

20. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1990.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

89-3. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1987.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1987.

89-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1988.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

MONTH IN REVIEW
January 1991

Civilian Labor Force

The state unemployment rate jumped sharply by 1.7 percentage points from 5.4 percent in December to 7.1 percent in January 1991 and reflected a major increase in unemployment and a corresponding decrease in employment. The brunt of this month's increase was felt outside New York City where unemployment rates had been low despite mounting job losses in the second half of 1990. The unemployment rate normally rises from December to January but this increase was about twice the usual amount. In fact, the 1.7 percentage point rise in the unemployment rate was the largest one month rise on record. An increase of nearly this amount (1.6 percentage points) occurred in January 1975 during another recession. In January 1990, the unemployment rate was 5.5 percent.

The comparable national jobless rate (not seasonally adjusted) increased by 1.1 percentage points to 7.0 percent in January as the slowdown in the economy deepened. The nation's unemployment rate was also 1.1 percentage points higher than it was one year ago.

At 61.9 percent, the civilian labor force participation rate (the proportion of the working age population in the labor market) was at its lowest for January since 1987. Participation has waned noticeably since the last quarter of 1990. One year ago, 202,000 more New Yorker's were in the labor force (either working or looking for work).

The number of persons employed declined 165,000 from December to 7,993,000 in January 1991. This was the worst January performance since 1980. The number of workers in the state has decreased 330,000 or 4.0 percent from January 1990.

Due to mounting job losses, total unemployment climbed 139,000 over the month to 605,000. Since January 1990, unemployment has increased by 127,000.

Nonfarm Employment

The number of nonagricultural jobs (which exclude agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) declined 215,700 from December 1990 to 7,981,900 in January 1991. The job count normally pulls back sharply in January and this month's loss was roughly in line with past December-January declines.

As usual for this time of year, all industry divisions experienced job losses. Cutbacks in retail trade, services, and construction employment accounted for two-thirds of the January job decline. The downturn in retail trade (-61,100) was somewhat less than in past years, reflecting below-normal hiring of temporary workers during the holidays. Services employment fell 53,000 from December as nearly all service industries reported fewer jobs. The heaviest service losses occurred in private education and business services. In line with past January performances, all types of construction activity continued to slow, with employment declining 29,100.

Public employment fell 28,900 in January, with the bulk of the downturn comprised of furloughs of hourly employees in local and state education. Factory payrolls dropped 20,800 jobs over the month, with nearly two-thirds of the downturn reported by nondurable-goods employers. The highly seasonal apparel industry dominated the nondurable-goods job reduction. The 7,400 decrease in finance, insurance and real estate employment was concentrated in real estate firms and stock brokerage houses. Layoffs by trucking companies caused most of the decrease in the number of transportation and public utilities jobs (-9,200).

Compared with a year ago, nonfarm employment in the state in January 1991 was lower by 116,000 or 1.4 percent. The current job loss was the most severe January-to-January decrease since 1976 when the state lost 125,400 jobs.

Since January 1990, employment has declined in wholesale and retail trade (-53,300), manufacturing (-48,600), construction (-33,200), finance, insurance and real estate (-26,700), and government (-2,200). Employment has increased in services (+42,800) and transportation and public utilities (+5,800).

ANNUAL REVISIONS OF NONFARM EMPLOYMENT ESTIMATES NEW YORK STATE, NEW YORK CITY AND SELECTED AREAS BY INDUSTRY, 1989-1990

Monthly estimates of wage and salary for nonfarm establishments in New York State, New York City, and selected areas by industry for the years 1989-1990 presented on pages 7 to 110 reflect the annual revisions to the 1990 benchmark. These estimates supersede those previously published for 1989 and 1990 in the January through December 1990 issues of the *Employment Review*.

Employment estimates are adjusted to reflect benchmark revisions of the covered and noncovered segments of the nonagricultural wage and salary employment series. Employment estimates for establishments covered by the New York State Unemployment Insurance Law under the previous benchmark have been updated where needed to the 1990 benchmark employment levels through 1990. Employment estimates for the noncovered sector such as interstate railroads, nonprofit religious, charitable, scientific, social and educational organizations and portions of government were adjusted to the 1990 benchmark based upon the latest information made available through other sources.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1990 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly Statistical Report and a Quarterly Analytical Report. The monthly statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties. The quarterly analytical report describes current trends in resident employment, unemployment, employment by industry and other labor market information for 11 major labor areas.

3. **Occupational Supply and Demand.** Discusses local and regional economic trends and implications for the future. Covers causes and solutions to today's tightening labor market, labor force projection to the year 2000, education and training programs, demand occupations and occupational projections. Reports are available for selected major areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1990-1992.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

8. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and mandays idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Reports 16, 17, 19 and/or 20 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Physical Therapist, Medical Assistant, Corrections Officer, Computer Programmer, Occupational Therapist, and Home Care Aide.

12. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

15. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

16. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

17. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

SPECIAL REPORTS--continued

18. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 52 pages.

19. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

20. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1990.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

89-3. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1987.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1987.

89-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1988.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

MONTH IN REVIEW
February 1991

Civilian Labor Force

The state unemployment rate was 6.6 percent in February, down from 7.1 percent in January. The February decrease of 0.5 of a percentage point followed a sharp increase in January of 1.7 percentage points. Both the February decrease and the January increase were concentrated upstate. In recent years, with the exception of 1990, the unemployment rate has declined from January to February. In February 1990, the unemployment rate was 5.5 percent.

The comparable national jobless rate (not seasonally adjusted) increased by 0.2 of a percentage point to 7.2 percent in February, a significant increase for the national rate at this time of the year. The nation's unemployment rate was up 1.4 percentage points from February of last year.

At 62.0 percent, the civilian labor force participation rate (the proportion of the working age population in the labor market) was at its lowest level for February since 1988. Participation has waned noticeably since the last quarter of 1990 with employment falling more than unemployment was rising. One year ago, 118,000 more New Yorker's were in the labor force (either working or looking for work).

Total unemployment declined 38,000 over the month to 567,000. Still, since February 1990, unemployment has increased by 93,000.

Nonfarm Employment

The number of nonagricultural wage and salary jobs (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) in New York State increased 10,600 from January to 7,992,500 in February 1991. The over-the-month upturn was about one-third of the usual improvement for this time of year.

Seasonal job gains in services and government were behind the rise in employment. Recalls of hourly workers in private colleges and universities caused over one-half of the 22,500 increase in services jobs. The bulk of the 17,800 upturn in public employment was almost entirely due to the recall of workers by school districts and community colleges. (Hourly employees in both public and private education are often furloughed during school vacations.)

Manufacturers reported only an 800 increase in factory jobs as durable goods cutbacks nearly offset nondurable goods gains. This increase was the smallest January-February gain in 16 years. Hires in the apparel industry, particularly women's outerwear, led the nondurable goods upturn. The downturn in durable goods employment was fairly widespread with the motor vehicle and equipment industry being the hardest hit.

The reduction in trade employment (-17,400) reflected both seasonal and cyclical influences. Except for restaurants, all other trade components reported lower job levels in February. Department store employment was down heavily, accounting for over half of the trade downturn, as the current economic slump forced several store closings and staff cutbacks. Construction was down about two and one-half times more than usual in February, dropping 10,300.

The transportation and public utilities (-2,300), and finance, insurance and real estate (-600) divisions reported less notable employment decreases. The shutdown of two airlines, one of them a major employer, and cutbacks elsewhere in the airline industry, caused the drop in the number of transportation and public utilities jobs. The small decrease in finance, insurance and real estate employment reflected continuing cutbacks by commercial banks and stock brokerage houses.

Compared with a year ago, nonfarm employment in the state in February 1991 was lower by 133,400 or 1.6 percent. The current job loss was the worst February-to-February employment reduction since 1975 when the state lost 210,900 jobs.

Since February 1990, the job count has declined in manufacturing (-58,000), wholesale and retail trade (-50,900), construction (-40,200), finance, insurance and real estate (-28,000), and government (-1,900). The job slippage was slowed by employment gains in services (+ 43,500) and transportation and public utilities (+ 2,400).

INSURED EMPLOYMENT AND PAYROLLS
SECOND QUARTER 1990

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 or more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organizations were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Effective January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were covered by unemployment insurance.

Agricultural labor was also covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Effective with first quarter 1985 data, employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are included in this series.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, the self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates two or more establishments in a single county that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover all wages and salaries paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1972 edition.

When a 2-digit manufacturing industry has less than 100 employees or less than three reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below:

-- *Albany-Schenectady-Troy*. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton*. Broome and Tioga counties.
-- *Buffalo*. Erie and Niagara counties
-- *Nassau-Suffolk*. Nassau and Suffolk counties.
-- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
-- *Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Syracuse*. Madison, Onondaga and Oswego counties.
-- *Utica-Rome*. Herkimer and Oneida counties.
-- *Westchester*. Westchester County.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT AND PAYROLLS IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
SECOND QUARTER 1990

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1990 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment in New York State (formerly Employment Trends).** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Occupational Supply and Demand.** Discusses local and regional economic trends and implications for the future. Covers causes and solutions to today's tightening labor market, labor force projection to the year 2000, education and training programs, demand occupations and occupational projections. Reports are available for selected major areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufactur-ing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1990-1992.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

8. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and mandays idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Reports 16, 17, 19 and/or 20 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Physical Therapist, Medical Assistant, Corrections Officer, Computer Programmer, Occupational Therapist, and Home Care Aide.

12. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

15. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

16. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

17. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

SPECIAL REPORTS--continued

18. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 52 pages.

19. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

20. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1990.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

89-3. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1987.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1987.

89-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1988.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

MONTH IN REVIEW
March 1991

Civilian Labor Force

The state unemployment rate moved up to 7.1 percent in March from 6.6 percent in February. Normally, the unemployment rate declines from February to March. The March increase of 0.5 of a percentage point was the largest increase in the unemployment rate during this time of the year since 1974. In that year the jobless rate also rose by 0.5 of a percentage point from February to March. The March increase was largely in New York City. The city rate jumped 0.8 of a percentage point over the month to 8.1 percent. In March 1990 the state unemployment rate was 5.3 percent.

The comparable national jobless rate (not seasonally adjusted) decreased by 0.1 of a percentage point to 7.1 percent in March. The nation's unadjusted rate normally falls by more than this in March. The nation's unemployment rate was up 1.7 percentage points from March of last year.

Total unemployment rose 44,000 over the month to 611,000. Since March 1990 unemployment has increased by 153,000.

Nonfarm Employment

The number of nonagricultural wage and salary jobs (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) in New York State increased by 31,600 from February to 8,024,100 in March 1991. The 1991 February-March increase was the smallest March job gain since 1975.

While employment increases were reported in every sector except manufacturing, the job growth in services, trade, and government was lackluster.

Small gains were scattered throughout services (+ 15,300), led by hires in health services, and amusement and recreation services. The 3,400 rise in trade employment was very weak compared to previous February-March increases. Several department stores closed in March. In addition, retail sales have been weak for some time. The 2,000 rise in government jobs reflected the resumption of night-class schedules by New York City schools.

Construction activity increased seasonally with the job count rising 9,400 in March. This job gain was in line with February-March increases over the last five years. Lesser employment advances were reported by employers in the finance, insurance and real estate (+ 1,800) and transportation and public utilities (+ 1,100) divisions. Both increases were in line with past job gains for this time of year. The bulk of the expansion in finance, insurance and real estate jobs occurred in the real estate and banking industries. The improvement in transportation and public utilities employment reflected hiring in the trucking and communications industries. Difficulties continued in the air transportation industry, with employment falling to its lowest level in 24 months.

Manufacturing was the only sector to lose employment over the month, down 1,700, as cutbacks by durable goods employers more than offset hires in the nondurable goods segment. Over half of the drop in durable-goods jobs was in the transportation equipment and instruments industries, while the apparel industry dominated the upturn in durable goods employment.

Compared with a year ago, the number of nonfarm jobs in New York State has declined by 161,300 or 2.0 percent, representing the worst March-to-March job loss since 1975 (-242,100 jobs). Manufacturing (-65,800) and trade (-57,200) accounted for over three quarters of the nonfarm downturn. Only employment in services (+ 36,500) and transportation and public utilities (+ 4,000) remained above year-ago levels.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1990 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment in New York State (formerly Employment Trends).** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Occupational Supply and Demand.** Discusses local and regional economic trends and implications for the future. Covers causes and solutions to today's tightening labor market, labor force projection to the year 2000, education and training programs, demand occupations and occupational projections. Reports are available for selected major areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufactur-ing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1990-1992.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

8. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and mandays idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Reports 16, 17, 19 and/or 20 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Physical Therapist, Medical Assistant, Corrections Officer, Computer Programmer, Occupational Therapist, and Home Care Aide.

12. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

15. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

16. **The Jobseeker.** An 84 page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

17. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

SPECIAL REPORTS--continued

18. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information. 52 pages.

19. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

20. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1990.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

89-3. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1987.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1987.

89-4. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1988.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

MONTH IN REVIEW
April 1991

Civilian Labor Force

The state unemployment rate moved up to 7.3 percent in April from 7.1 percent in March 1991. The April increase of two-tenths of one percent was only the fourth increase in the rate from April to March in the last 22 years. The April increase reflected continued deterioration in the New York City job market. The city rate jumped 0.8 of a percentage point over the month to 8.9 percent. In April 1990 the state unemployment rate was 4.8 percent.

The comparable national jobless rate (not seasonally adjusted) decreased by 0.6 of a percentage point to 6.5 percent in April. The nation's unemployment rate was up 1.3 percentage points from April of last year.

The number of persons employed in the state increased 27,000 from March to 7,968,000 in April, despite an employment reduction of 72,000 in New York City. Employment in the state was down significantly--202,000 from April 1990.

Total unemployment rose 15,000 over the month to 626,000 in April 1991. Since April 1990 unemployment has increased 215,000.

Nonfarm Employment

The number of nonagricultural wage and salary jobs (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) in New York State increased 35,000 from March 1991 to 8,059,100 in April. This gain was only slightly below the average March-April improvement over the last five years of 38,300. Seasonal hiring in the construction and services industry divisions accounted for over 80 percent of the nonfarm job upturn.

Construction activity picked up seasonally in April with 16,700 jobs added to construction payrolls. The bulk of the pickup was related to highway and bridge construction. The number of services jobs rose 11,900 in April. Hiring by employers in the landscape and lawn services, and amusement and recreation service highlighted the services job expansion. Manufacturing, which normally loses employment at this time of year, inched upward by 2,500. Recalls of automobile workers in the transportation equipment industry were the primary reason for the factory job gain.

The trade and transportation and public utilities group posted less notable employment advances. Wholesalers and retailers added 6,900 jobs to their pay rosters with gains by eating places and building supply establishments leading the upturn in trade employment. Transportation and public utilities employment rose 1,000 over the month as trucking companies hired workers.

Job losses in the public sector (-4,300) and finance, insurance and real estate (-200) slowed the expansion in nonfarm employment. Budget cutbacks by state and local governments prompted the decline in public employment. Job losses in the banking and brokerage industries overshadowed seasonal hiring by realtors.

Compared with a year ago, nonfarm employment in the state in April 1991 was lower by 134,400 or 1.6 percent. All industry divisions, except services (+ 37,700) and transportation and public utilities (+ 1,400) shared in the downturn. Manufacturing (-53,000) and trade (-44,200) accounted for the largest job losses.

INSURED EMPLOYMENT AND PAYROLLS
THIRD QUARTER 1990

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 or more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organizations were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Effective January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were covered by unemployment insurance.

Agricultural labor was also covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Effective with first quarter 1985 data, employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are included in this series.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, the self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates two or more establishments in a single county that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover all wages and salaries paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1972 edition.

When a 2-digit manufacturing industry has less than 100 employees or less than three reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below:

- *Albany-Schenectady-Troy*. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
- *Binghamton*. Broome and Tioga counties.
- *Buffalo*. Erie and Niagara counties.
- *Nassau-Suffolk*. Nassau and Suffolk counties.
- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
- *Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
- *Syracuse*. Madison, Onondaga and Oswego counties.
- *Utica-Rome*. Herkimer and Oneida counties.
- *Westchester*. Westchester County.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT AND PAYROLLS IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE

THIRD QUARTER 1990

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1990 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.

Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment in New York State (formerly Employment Trends).** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Occupational Supply and Demand.** Discusses local and regional economic trends and implications for the future. Covers causes and solutions to today's tightening labor market, labor force projection to the year 2000, education and training programs, demand occupations and occupational projections. Reports are available for selected major areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufactur-ing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Occupational Needs, New York State, 1990-1992.** Projects the demand for workers in various jobs. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns.

7. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

8. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and mandays idle; describes major work stoppages.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Reports 16, 17, 19 and/or 20 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Physical Therapist, Medical Assistant, Corrections Officer, Computer Programmer, Occupational Therapist, and Home Care Aide.

12. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

13. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

14. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

15. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

16. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

17. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

SPECIAL REPORTS--continued

18. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 52 pages.

19. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

20. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.
